

# Sport Clubs

Sports Clubs are comprised of SIU students and SRC members who have the desire to participate in a sport activity, get in shape or socialize with others who share a common interest. Each club's level of activity is unique and varies from instructional to local to regional to national competition. The SIU Sports Clubs program has a rich tradition and continues to grow due to strong student leadership, which is one of a variety of life skills that students can develop through their participation.
